Projects

- **E-commerce Platform Development**

Built a custom e-commerce platform for a fashion company, integrating features such as product management, payment gateway, and order tracking.

Results: Successfully launched the platform, resulting in increase in online sales and reduction in order processing time.

Skills Utilized: Nodejs, EJS SSR, Database management(mysql), Github for version control and Communication for client relations.

- **Contest Management API Development**

Developed a RESTful API for contest management, enabling the creation and tracking of contest, contestants and voting of contestants.

Results: A functional API that was consumed by the frontend developer

Skills Utilized : nodejs, Express, Database management (mysql), ORM for easy Database migration, git for version control
